**Description:** The Undergraduate Award in Applied Spectroscopy is awarded by the New York Section of the Society for Applied Spectroscopy in order to recognize excellence in the field of Applied Spectroscopy. Up to five undergraduate awards will be presented.

**Award:** $100, a one year membership to the SAS, plus an invitation to the student awards dinner.

**Terms and Eligibility:** Undergraduate students must be in at least their junior year.

**Application/Nomination Deadline:** March

**Special Notice:** Nominations for this award are made by the student's research advisor and must include:

a.) A letter of nomination from the student’s research advisor or from an authorized representative of an industrial sponsor of the student’s research. (Students are not permitted to self-nominate.)
b.) Letters of recommendation from at least one additional faculty members or other scientists who are familiar with the quality of the student's work.
c.) Transcripts that document all university credits (unofficial transcripts are OK).
d.) A one-page summary of the research project written by the student including reference to any of the student's published work, demonstrating applicability of the research to the field of applied spectroscopy.
e.) Telephone numbers, addresses and e-mail addresses of both the student & research advisor.
