Speakers - not necessarily in this order:

**Rastislav Levicky**
*Polytechnic Institute of NYU, Department of Chemical and Biological Engineering*

*Morpholinos: Some Fundamental Properties and Diagnostic Applications*

**Ned Seeman**
*New York University, Department of Chemistry*

*DNA is not Merely the Secret of Life: Using Chemical Information to Control the Structure of Matter*

**Daniel Steingart**
*Princeton University, Andlinger Center for Energy and the Environment*

*Low Cost, Abundant, Defective Materials for Large Scale Electrical Energy Storage*

Sessions feature three 30-minute presentations on nanoscience, one each with strong orientation in biology, chemistry, and physics/applied mathematics. Presentations will be focused on discussion of recent work, although speakers will be expected to place the work in a context understandable to a broad audience.

*Joint Meeting with Nanoscience Topical Group New York Section, American Chemical Society*
