Patterned after the NY Structural Biology Discussion Group, sessions feature three 30-min presentations on nanoscience, one each with strong orientation in biology, chemistry, and physics/applied mathematics. Presentations will be focused on discussion of recent work, although speakers will be expected to place the work in a context understandable to a broad audience. At present, 1-2 sessions are planned per semester. Initially, presenters will be selected mainly from NYU faculty, but will eventually expand to other interested researchers in the NY metropolitan area.

We are pleased to announce the first meeting, which will feature 30-minute presentations by the following NYU faculty members:\*

- Todd Holmes, Department of Biology
- Andy Kent, Department of Physics
- Ned Seeman, Department of Chemistry

\*Speaker order will not be announced.
